Service-relevant changes to the adjuster of Knorr-Bremse Air Disc Brakes

In order to optimize the coverage of different vehicle applications as well as regional differences, Knorr-Bremse continuously works to improve its air disc brake product portfolio to correspond to customer and market requirements.

In this context some service processes may need revision. A change is now advised relating to the checking process of the adjuster and running clearance for air disc brake types SB6/7, SN5/6/7 and SK7.

Revised Process for these disc brakes:

Adjuster Check

The adjuster should be turned anti-clockwise by **three** clicks – formerly two to three.

Pad Fitting

After the pads have been adjusted to touch the brake disc, the adjuster should be turned anti-clockwise by **three** clicks – formerly two to three.

The full wording of the processes is included in the latest service manual for each Knorr-Bremse range.
