TECH TIP

2012MY – 2015MY Chassis Wire Harness Connector Lever

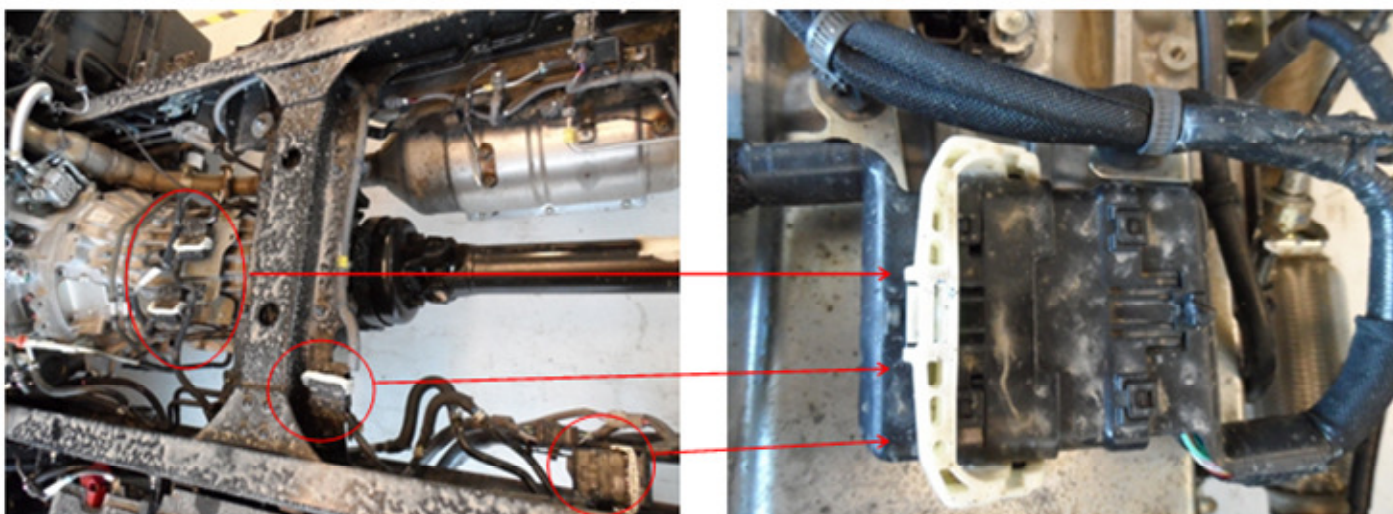

SUBJECT VEHICLES:

2012 through 2015 model years (XFC710, XFC720, XFC740, XJC700, XJC710, XJC720, and XJC740 cab-over-engine (COE) trucks).

Note: This technical tip is provided as technical information and is not authorization for a warrantable repair.

CONDITION:

When disconnecting one of the inline chassis harness connectors on the vehicle, there is potential that the white connector lever may break due to degradation of the white plastic material. In the event that the connector lever does break, a replacement connector shell which includes the lever has been made available to service the broken lever. The new connector lever will be black in color and can be transferred to the existing connector shell.
