RE: 2002-03 Multi-model Passenger Airbag Safety Recall **UPDATE**

American Honda has revised service bulletin 14-040, *Safety Recall: Front Passenger's Airbag Inflator Can Be Over-Pressurized* to include parts, warranty, and repair information. Vehicles displaying links to this bulletin can now be repaired, and claims can be submitted for processing.

Because parts supply remains tight, American Honda expects to begin notifying customers of this market action gradually, including more customers as parts are received. However, should an affected vehicle arrive at your dealership, the repair should be completed regardless of whether the customer has been notified or not.

As always, be sure to check VIN inquiry to determine if this campaign applies to a particular vehicle.

Click [here](#) for a copy of the revised service bulletin.
