Offboard Diagnostic Information System Service (ODIS Service)

Number: VOS-14-18

Subject: VW Content Version 2.5.0 – Patch Installation
Instructions

Date: June 19, 2014

1.0 – Introduction

A patch update is required after downloading and installing **VW diagnostic data - content version 2.5.0**. This patch ensures proper Software Version Management (SVM) coding functions for certain models.

Notes:

- *The following procedure must be performed **by qualified personnel only!***
- *Please read these instructions in their entirety before performing these instructions. **If you are not familiar with ODIS Service version identification methods or do not otherwise understand these instructions, arrange to have a qualified person perform the procedure.***
- ***Discard all printed copies of this document after use.** Revised versions may be issued at any time. Always check ServiceNet for the latest version.*

2.0 – Procedure

IMPORTANT!

- **VW diagnostic data - content version 2.5.0 (Main feature: 5.5.105) MUST** be downloaded and installed via online update **BEFORE** performing the patch installation described below.
- For information on identifying the content version, refer to Service Information – ODIS Service document title: *Online Update Guide – Section 7.0*.

Prerequisites:

- ☐ Diagnostic device booted to Windows desktop and connected to dealership network.
- ☐ VW diagnostic data - content version **didb_v.en_US: 2.5.0 (Main feature: 5.5.105)** installed.
- ☐ **ODIS Service NOT running.**

1. Logon to **VW ServiceNet**.
2. Go to: **Workshop Equipment > Offboard Diagnostic Information System Service (ODIS Service) > ODIS Service > Software**
3. Double-click the link: **ODIS_VW_2.5.0_Patch**
4. **Save** the file to the Windows desktop.
5. **Right-click** the saved .zip file and select **Extract All...** from the dropdown menu.
