Front Fender - Corrosion on Wheel Arch

Customer states:

Corrosion on the wheel arch area of the front fender (Figure 1).

Figure 1 (corrosion on left wheel arch)

Note:

To determine if this procedure is covered under Warranty, always refer to the *Warranty Policies and Procedures Manual*.

Documentation required per *Warranty Policies and Procedures Manual*.

For vehicles outside of the Limited Warranty Against Corrosion Perforation this Technical Bulletin is for information only.

Technical Bulletin

Technical Background

The wheel liner touches the arch area of the fender and rubs off the paint in the contact area.

The corrosion is caused by dirt accumulations and movements of the wheel liner.

Production Solution

No production change required.

Service

1. Repair the fender: If the edge area is only slightly corroded (no through-corrosion/perforation), proceed as follows:

- Remove the front bumper according to the repair manual. See Repair Manual Group 63 in Elsa.
- Remove the side indicator (in fender, if equipped) according to the repair manual. See Repair Manual Group 94 in Elsa.
- Remove the front wheel liner according to the repair manual. See Repair Manual Group 66 in Elsa.
- Remove the corrosion with the pneumatic brush grinder VAS 6446.
- Apply a VOC compliant epoxy primer as an anti-corrosion treatment and primer (locally sourced).
- On the inner fender apply (in the complete contact/edge area) adhesive/sealer (part number: D 511 500 A2) as further edge protection (Figure 2, green line).

Figure 2

- Restore the paint structure according to the paint repair manual.
- Install the wheel liner according to the repair manual. See Repair Manual Group 66 in Elsa.

Technical Bulletin

 **Note:**

When installing the wheel liner, make sure it doesn't touch the edge of the fender. As necessary, align the liner.

- Install the side indicator (in fender, if equipped) according to the repair manual. See Repair Manual Group 94 in Elsa.
- Install the front bumper cover according to the repair manual. See Repair Manual Group 63 in Elsa.

2. Replace the fender

- Replace the fender according to the repair manual. See Repair Manual Group 50 in Elsa.
- Apply polyurethane adhesive (part number: AKD 476 KD5 05) on the inner fender (in the complete contact and edge area) as further edge protection (Figure 2, green line).

 **Note:**

When installing the wheel liner make sure it doesn't touch the edge of the wing. As necessary, align the liner.

If through-corrosion (perforation) is not present, fender replacement will only be accepted if it qualifies per the Reimbursement Policy section of the *Warranty Policies and Procedure Manual*. This section provides important guidelines when considering component repair vs. replacement options (the "80% rule").

Warranty

 **Note:**

- Dealers may complete the repair as described without prior authorization (through a WISE Warranty Repair Acceptance request).
- Documentation required: Clear pictures, completed estimate and body shop invoice must be saved and kept on file at the Dealership for audit purposes.
- This bulletin applies for 1 front fender repair or replacement. If both sides exhibit the corrosion they should be evaluated individually and claimed on separates lines. Total Body Painting Prep Time for both front fenders should be claimed on the first line only.
- Labor time units (TU), Material units (MU), and Material unit rate are correct at the time of publication. The time units and/or material units may differ if the repair catalogue is updated. The information in the repair catalogue applies, except for the open time items (labor operations ending in 99) which are calculated at actual time multiplied by the body shop labor rate. The material allowance (Paint material price per unit) is subject to change. Refer to **WISE > Resource Center > Forms > Paint/Corrosion for the most current forms.**
- This section is applicable for vehicles within the terms of Volkswagen's Limited Warranty Against Corrosion Perforation. For vehicles outside the terms of the Limited Warranty Against Corrosion Perforation this section is for information only.
- This bulletin may be provided to outside shops to ensure the proper repair is completed.

Technical Bulletin

Note:

Claim Processing Options

Option 1: Utilize the attached form examples and pre-populated forms on WISE to assist with calculating the reimbursement amounts. **This will expedite the claim review process and reduce the time to pay the claim.**

Note that miscalculations are subject to claim adjustment.

For the complete set of pre-populated Paint/Corrosion Claim Form templates associated with this Technical Bulletin, refer to WISE > Resource Center > Forms > Paint/Corrosion.

Option 2: Email repair estimates to paintcamp@vw.com. The Paint and Corrosion Team will calculate the warranty allowance and complete the required form(s) on behalf of the dealer.

To determine if this procedure is covered under Warranty, always refer to the <i>Warranty Policies and Procedures Manual</i> ¹⁾
