Re: Warranty Extension: Civic & Fit Electric Power Steering Control Unit

Today, September 23, 2014, American Honda is announcing a warranty extension for all 2006-07 Civic Hybrid, 2006-09 Civic Si 2-door, 2007-09 Civic Si 4-door, and 2007-08 Fit. An issue with the electronic power steering is being addressed by this warranty extension. Resin contamination of a failsafe relay may cause increased resistance. Increased resistance can cause the EPS control unit to detect an open circuit in the harness, setting DTCs 39-02 and/or 61-04 and shutting power steering assist off. To increase customer confidence, American Honda is extending the warranty on the electric power steering control unit to 10 years from the original date of purchase, or 150,000 miles.

Service bulletin 14-058, *Warranty Extension: Electric Power Steering With DTC 32-09 or 61-04* was posted to ISIS today in support of this warranty extension, and it includes parts, repair, and warranty information related to the campaign.

As always, be sure to check VIN status inquiry to determine if a particular vehicle is eligible for this warranty extension.
