

Service Information

Offboard Diagnostic Information System Service (ODIS Service)

Number: AOS-14-22

Subject: Audi RVU ECU Update Patch

Date: Sept. 22, 2014

1.0 – Introduction

A patch is required to ensure proper RVU ECU update functions.

Notes:

- *The following procedure must be performed **by qualified personnel only!***
- *Please read these instructions in their entirety before performing these instructions. **If you are not familiar with ODIS Service version identification methods or do not otherwise understand these instructions, arrange to have a qualified person perform the procedure.***
- ***Discard all printed copies of this document after use.** Revised versions may be issued at any time. Always check ServiceNet for the latest version.*

2.0 – Procedure

IMPORTANT!

- Audi diagnostic data - content version 1.1961.3506 or higher must be downloaded and installed via online update **BEFORE** performing the patch installation described below.
- For information on identifying the content version, refer to Service Information – ODIS Service document title: *Online Update Guide – Section 7.0.*

Prerequisites:

- ☐ Diagnostic device booted to Windows desktop and connected to dealership network.
- ☐ Audi diagnostic data - content version **didb_GFS-a.en_US: 1.1961.3506 or higher** installed.
- ☐ **ODIS Service NOT running.**

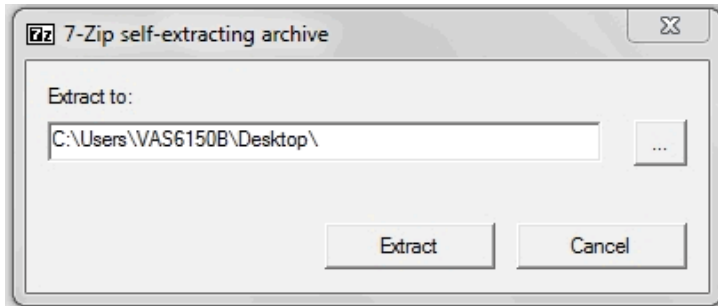

1. Logon to **Audi ServiceNet**.
2. Go to: **Workshop Equipment > Offboard Diagnostic Information System Service (ODIS Service) > ODIS Service > Software**
3. Double-click the link: **ODIS_Audi_RVU_DLL_Patch**
4. **Save** the file to the Windows desktop.

Continued... 2/

5. Locate and **double-click** the saved file on the desktop:

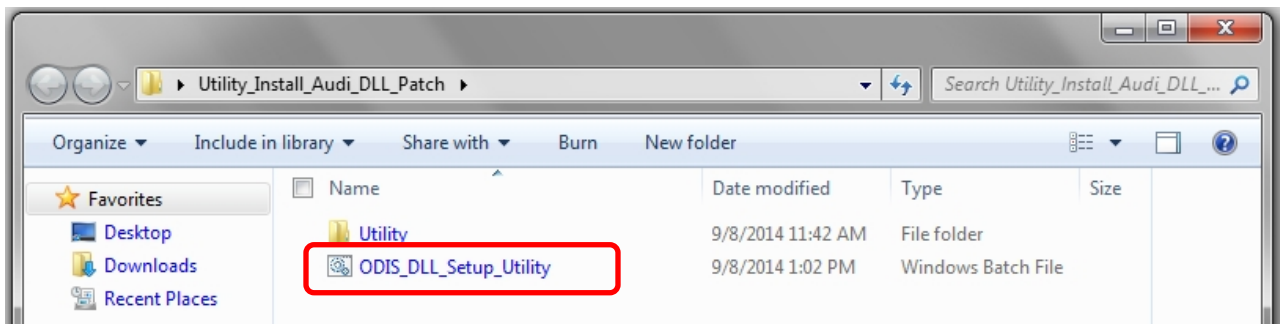

6. Click **Extract**:

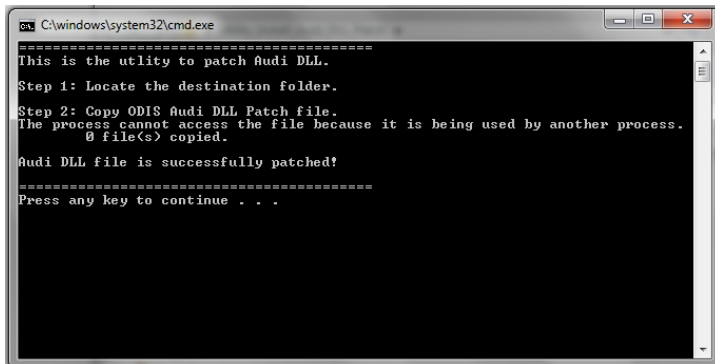

A folder entitled: **Utility_Install_Audi_DLL_Patch** is created on the desktop.

7. Locate and **open** the folder specified above.
8. Double click the **ODIS_DLL_Setup_Utility** batch file:

9. Press any key to continue:

The patch file installation is completed. We recommend deleting the saved files from the desktop.
