

Service Bulletin

File in Section: -

Bulletin No.: PI1266

Date: June, 2014

PRELIMINARY INFORMATION

Subject: Radio Reprogramming Using Techline/Service Programming System (SPS) - Ensuring Correct Vehicle Selection

Models: 2015 and Prior GM Passenger Cars and Trucks
Condition/Concern

A technician may find that when manually building a vehicle in SPS, more than one vehicle is shown in the list of available vehicles for programming.

Recommendation/Instructions

To ensure proper vehicle selection, it is recommended to use the vehicle VIN within SPS. This way the system selects the correct vehicle information, including all applicable option codes, and loads the correct software for that particular vehicle.

The screenshot shows the 'Service Programming System' window with the following fields and values:

Validate/Select Vehicle Data	
Salesmake	Buick
Model Year	2014
Vehicle Type	Passenger Car
Car Line	ENCORE (China) EXCELLE GL8 Firstland GL8 LUXURY Lacrosse (NAO) New Lacrosse (China) Regal Regal (China)

3945113

Note: When a country (i.e. China) is listed in the Car Line, this is to identify its country of sale, not its point of origin.
