SUBJECT: **Valve and Liner Installation Tool Issue**

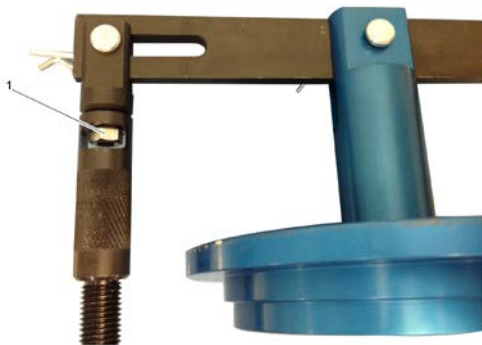

ISSUE

Valve and liner installation tool part numbers J-47406 and J-47407 have lock nuts on the swivel lever retainers that could loosen unexpectedly. This can potentially cause injury if the nut (1) falls off the threads during use.

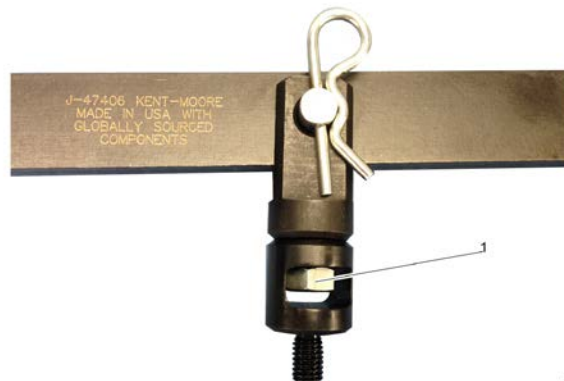

REQUIRED ACTION

Prevent this issue by adding a thread-locking compound (Loctite or equivalent) to the nut threads before the next use. Use care not to tighten the nut to prevent the swivel from rotating during repairs.
