Title: Pre-2007 Air Cleaner Snow Valve Replacement

Applies To: 7000 series Trucks with pre-2007 Emmissions Cummins Engines Only

DESCRIPTION

Problems with the electrically operated snow valve on a 7000 model truck with a Cummins engine

RESOLUTION

Replace it with one of the following feature codes. You will have to call Parts Specs at 630-753-7327 and explain you want to add one of the following feature codes to your VIN. They can send you the parts you need. These feature codes will replace the existing electrically operated snow valve with an air cleaner that has an integral precleaner and does not need a snow valve. You will also have to remove the switch in the dash and remove the fuse from the cab fuse block.

CIRCUIT DIAGRAMS

- 12VBJ AIR CLEANER Single Element, with Integral Snow Separation Module
- 12VBK AIR CLEANER Dual Element, with Integral Snow Separation Module
