Title: Allison WT Gen 3 Transmission Control Module Relocation

Applies To: Model: 4300 Start Date: 11/01/2000 4400 Start Date: 11/01/2000 7400 Start Date: 11/01/2000 7500 Start Date: 11/01/2000

DESCRIPTION

This TSI applies to the models listed above with International ® I-6 engines. Vehicles operating in severe on-road applications may require the relocation of the Transmission Control Module for better environmental protection. The following procedures are required to relocate the Allison ® Transmission Control Module from the frame crossmember under the rear of the cab to inside the cab on the cab rear sill on those vehicles equipped with International ® I-6 engines. TSI-05-13-03 provides the procedures for doing a similar relocation for those vehicles equipped with Caterpillar © C10/12 and Cummins ® ISM engines.

For TCM relocation on a truck with a CAT ® or Cummins ® engine, [click here TSI 05-13-03](#).

For TCM relocation on a truck with an International ® I-6 engine, [click here TSI 06-13-01R](#).

For Gen 4 Allison ®, refer to the sales data book and feature 0013WYH.
