

Remote engine start via external starter switch sporadically not possible, fault code B150B

Topic number	LI54.21-N-059919
Version	2
Design group	54.21 Control modules/modules
Date	09-29-2014
Validity	MODEL 906 with engine 651 with code (XM0) Facelift with code (ED5) Parameterizable special module MODEL 906 with engine 651 with code (XM0) Facelift with code (ED8) Electrical system preinstallation, parameterizable special module
Reason for change	Validity adapted
Reason for block	

Complaint:

Remote engine start via external starter switch sporadically not possible, fault code B150B in parameterizable special module (PSM) control unit.

Cause:

Software of CDI control unit (engine control unit).

Remedy:

No remedy at the present time (starting is possible again after an ignition cycle).

New engine control unit software is expected to be available in Week 45/2014.

Symptoms
Power generation / Engine management / Starter motor / Starter Function / Does not turn
Power generation / Engine management / Engine start/stop / Does not start

Control unit/fault code		
Control unit	Fault code	Fault text
PSMParameterizable special module (PSM906)	B150B	The function 'Engine start' could not be activated because the switch-on conditions were missing. (MOPF)
