| Reason for change |                                                                                                                      |
| Reason for block  |                                                                                                                      |

---

### Complaint:

The time on the analog clock is slow.

### Cause:

Software release in COMAND (A40/3).

### Remedy:

Update the software in the COMAND control unit (A40/3) to at least software release 14/17 (E29.9c), available as of XENTRY/DAS 09/2014.

Please do not replace any parts.
