

Flashing or SCN coding of airbag control units

Topic number	LI91.60-P-059056
Version	1
Design group	91.60 Airbag, pedestrian protection
Date	05-16-2014
Validity	Airbag control units with diagnosis via Xentry
Reason for change	
Reason for block	

Complaint:

Flashing or SCN coding of airbag control units is not possible.

Cause:

The airbag control unit is locked after initial startup; flashing of software or SCN coding can no longer be performed in this state.

Remedy:

This means that the claim cannot be encoded with damage code 82485 90 or 82485 F1 in these cases. In this respect we should like to remind you that the Pre Safe system is not a function of the restraint system. Issues with the Pre Safe system cannot be resolved by remedial action in the restraint system (SRS) control unit. Please refer also to GI 91.40-P-058462.

Symptoms

Body / Safety system / Pre-Safe system / Nonfunctional

Body / Safety system / Pre-Safe system / Display message: Pre-Safe features currently limited (see operator's manual)

Work units

Op. no.	Operation text	Time	Damage code	Note
			82485 90	Software
			82485 F1	Variant coding

Validity
