

Brake pedal/carpet seal does not fit properly

Topic number	LI29.10-P-051288
Version	2
Design group	29.10 Pedals, bearing bracket
Date	06-09-2014
Validity	All model series 450 All model series 451 up to 02.04.2007 All model series 451 as of 03.04.2007
Reason for change	New part numbers and text updated
Reason for block	

Complaint:

The carpet seal between the brake pedal and the carpet does not fit or is leaky.

File	Description
Rastnase Faltenbalgtrager ist nicht korrekt eingerastet.jpg	The catch tab of the boot carrier is not correctly engaged

Cause:

As part of a modification to the body on model series 451 as of 03 April 2007 (first VIN: WME4513001K014181), an additional doubler panel was installed in the area of the brake pedal. Due to the doubling of the floor, the previously used carpet seal had to be adjusted.

Remedy:

Before installing, please check whether the correct seal is present.

Note: Before installing the boot carrier and carpet seal, please make sure that all four catch tabs on the pedals are properly engaged (see attachment).
