Cause:

The receiver in the SENTEX gate operator receives only in a very narrow frequency range. Due to tolerance in its design, the Homelink transmitter may not always transmit within this frequency range. The mirror will learn the hand-held Klik Card transmitter, but when transmitting, it may not operate the SENTEX gate operator.

This issue affects both GEN 3 and GEN 4 models of Homelink mirrors.

- GEN 3 models are the mirrors with the single color LED in vehicles up to MY11.
- GEN 4 models are the mirrors with the mult color LED in vehicles after MY11 with new programming procedure.

Remedy:

The SENTEX gate operator with Klik Card remotes are not compatible with Homelink.

A "Garage Door Universal Receiver Kit" can be installed on the gate to allow it to operate with Homelink. The kit is available from Homelink.

If you have further questions relating to the garage door opener, its range, compatibility or ordering of a universal receiver, please visit the internet site: <http://www.homelink.com> or call the HomeLink hotline: toll-free hotline USA: 1 800 355 3515

Symptoms
Body / Interior equipment / Garage door opener / Nonfunctional
