DIAGNOSIS:

Using a Scan Tool (wiTECH) with the appropriate Diagnostic Procedures available. If Audio DTC's are present, record them on the repair order and repair as necessary before proceeding further with this bulletin.

If the customers describe the symptom/condition, perform the Repair Procedure.

PARTS REQUIRED:

Qty.	Part No.	Description
1 (AR)	**Disc N/A. (See Note)**	Update disc **Not Yet Available**

NOTE: **Software updates are now available for download to USB on the Uconnect web site and should be used instead of ordering a disc. The update disc availability will lag behind the download site.**

REPAIR PROCEDURE:

- Has the USB update memory sticks been created?
 - Yes >>> Proceed to [Step #3](#).
 - No >>> Proceed to [Step #2](#).
- Go to DealerCONNECT>Service>UCONNECT Information & Utilities> Uconnect Dealer software downloads to down load the files. Follow the instructions on the web site to create the USB memory stick.

NOTE: A blank USB stick must be used to down load the software. The memory stick should be 4 GB or larger.

NOTE: If the dealer cannot down load the software, make sure you have proper security access. If not have the Service Manager or Shop Foreman down load the software update. If the Service Manager or Shop Foreman can't down load the software, an update disc can be ordered. If using a CD to down load the software follow the instruction on the CD to properly transfer the correct software to a USB stick.

3. Turn the engine on and check if the vehicle is still in ship mode. This will be displayed in the Electronic Vehicle Information Center (EVIC).
4. The vehicle must be in Customer Mode to update the radio. Is the vehicle in Ship Mode?
 - a. Yes >>> Proceed to [Step #5](#).
 - b. No >>> Proceed to [Step #6](#).
5. Use the scan tool (wiTech) to put the vehicle into customer mode.
6. With the engine running and radio powered on, insert the **correct** USB Stick with new software into USB hub.
7. The next screen display will have the old and new software levels. The radio will be updated to **14.06.07**.
8. Is the current software level at or higher then the update to software level?
 - a. Yes >>> The bulletin is doesn't pertain, normal diagnostic should be performed.
 - b. No >>> Proceed to [Step #9](#).
9. Press the soft key "Yes" to start the update.
10. The update may take 12 minutes, no other actions will be needed.

NOTE: If the software update process is interrupted/aborted, the process should be restarted.

NOTE: Do not cycle the ignition or touch the radio during the update process.

11. After the update is done, the screen will is display the software levels again.

NOTE: Please note during this process the screen will go blank 2 times. Once in the beginning and once at the end of the re-flash process.

12. Press "No" and turn off the vehicle. Open and then close the drivers door and let the Buss go to sleep. This will complete the radio update.
13. Remove the USB update stick, the bulletin has been completed.

NOTE: Use the wiTech to put the vehicle back into Ship Mode if needed.

POLICY:

Reimbursable within the provisions of the warranty.

TIME ALLOWANCE:

Labor Operation No:	Description	Skill Category	Amount
18-60-02-BR	Radio, Check Software Level and Perform Software Update (0 - Introduction)	6 - Electrical and Body	0.3 Hrs.
18-60-02-BT	Radio Software - Create USB Update Stick (First Time Only) (0 - Introduction)	6 - Electrical and Body	0.2 Hrs

NOTE: The expected completion time for the flash download portion of this procedure is approximately 12 minutes. Actual flash download times may be affected by vehicle connection and network capabilities.
