

Service Bulletin

File in Section: -

Bulletin No.: PI1300

Date: September, 2014

PRELIMINARY INFORMATION

Subject: Information on Resetting the Change Transmission Fluid Message On Driver Information Center (DIC)

Models: 2008-2009 Saturn VUE
Equipped with BAS Hybrid or Transmission ME7, MH2 or MH4

When the Change Transmission Fluid message is displayed on the DIC, and after changing the transmission fluid, there is no process to reset the oil life monitor to zero and turn the message off.

Software in the TECH2 for the Saturn application does not have a transmission oil life reset feature.

Technicians should use this work around procedure with a TECH2 to reset the transmission oil life monitor.

1. On the TECH2, select Diagnostics.
2. 2009
3. Passenger Car
4. Cadillac
5. K
6. Powertrain
7. TCM
8. Module Setup
9. Reset Transmission Oil Life
10. Type 100%
11. Perform Reset
