

**SUBJECT****Low Cost Charging Functionality****MODEL**

I01 (i3 and i3 REx)

SITUATION

Low Cost Charging is a standard i3 feature which allows customers to select a period of time in which they would like charging to take place; they can thus take advantage of lower off-peak electrical supply rates, if applicable.

In some instances when Low Cost Charging is set, the vehicle begins to charge immediately and not at the scheduled time. This is not an issue with the vehicle.

INFORMATION

Refer to the attachment for the operation, description and settings of the Low Cost Charging feature.

WARRANTY INFORMATION

Not applicable.
