Backrest jams

Topic number	LI91.10-P-059377
Version	1
Design group	91.10 Front seats
Date	07-10-2014
Validity	Model series 216 with code 808
Reason for change	Remedy text revised and damage code added
Reason for block	

Complaint:
Front seat backrest locks at folded-forward position

Cause:
When the seat fore/aft adjustment operating switch is operated manually with the backrest in the folded-forward position, the automatic compensation motion of the backrest may cause locking.

Remedy:
To release the locking, firmly jolt the backrest opposite the direction of travel.

It may be necessary to release the backrest using the DAS (manual adjustment of the backrest angle).

No work on the release mechanism is necessary.

Modified software will prevent the compensation motion in the folded-forward position.

Update the left and right seat control unit N32 to the current software version using Xentry.

Symptoms
Body / Seat / Seat adjustment / Stiff/sluggish
Body / Seat / Seat adjustment / Function error
Body / Seat / Seat adjustment / Does not unlock
