

Sloshing noises from area of rocker panels/ longitudinal members

Topic number	LI63.30-P-058687
Version	1
Design group	63.30 Outer longitudinal members
Date	03-13-2014
Validity	Model series 207 with production date as of 09/2009 up to 10/2010.
Reason for change	
Reason for block	

Complaint:

Sloshing noises from area of rocker panels/ longitudinal members on left and right.

Cause:

Due to clogged drain grommets at the bottom, water can collect inside the rocker panel.

Remedy:

- Remove longitudinal member panel.
- Remove grommets.
- Drain water.
- Dry rocker panel/ longitudinal member (e.g. in paint drying booth).
- Then preserve rocker panel/ longitudinal member with cavity wax.
- Install new grommets (do not clean and reuse the old grommets!).
- Assemble vehicle.

Symptoms
Body / Body/Cab / Body sealing / Water entry
