Option Releases and Inactivations

Historically, TBB releases Product Awareness Bulletins for product releases that have wide scale impact on the product line. However, we haven't always given notice of releases that were done specifically for a certain bid, and we have rarely given notice of inactivations. Since these new features may be useful to all dealers and inactivated sales codes may have been on historical orders, we're beginning the process of notifying the dealer body of all changes. Below is a list of changes that were not released in individual PAB's for the first half of the year. From this point forward we will publish a PAB quarterly with these changes.

The miscellaneous options (sales codes) listed below have been released and made available to all dealers beginning January 1, 2014 through June 30, 2014.

Feature	Description	Action
B320203XXX	LED DOME LIGHTS - EFX	Released
