Ricon Lifts Canadian Dealers Only

Ricon's latest lift pricing release to TBB has increased the price on the Canadian Model lifts to the point where they will now be some \$500.00 more expensive than the US FMVSS 403/404 comparable models. Ricon has stated this pricing is typical to all bus manufacturers.

Although FMVSS 403/404 lifts are not required by law in Canada, they are allowed and do offer some added features over the non 403/404 models. Having to order the 403/404 lift will increase your cost but not as much as the new pricing for a Canadian lift.

Therefore effective immediately, the following Ricon lift model options will be discontinued:-

B704829000
B704832000
B704833000
B704834000
D116400022
D116400023
D116400024
D116400025

Any committed order as of August-08- 2014 with any of the above Canadian model Ricon lift will be honored at the current price. Any new order placed after that must use the 403/404 compliant lift

Below is a summary of changes that will take effect in ASIST.

Feature	Description	Action
B704829000	RICON K5510-S10002000 33X54", LS (REAR) MOUNTED PUMP CANADA	Inactivated
