

RADIATOR ROCK GUARD

WORK SMART™

Freightliner Trucks offers a radiator rock guard for vocational trucks

Freightliner Trucks is now offering a radiator rock guard on 114SD and 122SD vehicles. Prior to the availability on these SD models, this option was only offered with the M2 106 and M2 112. This option is currently available to order with the SD models in SpecPro as of June 2014.

What is it?

- A rock guard is a screen that protects the radiator between the bottom of the grille and the top of the bumper

Why is it important?

- In severe duty applications, a rock guard helps to protect the exposed region of the radiator between the grille and bumper in harsh environments

Availability:

- 114SD and 122SD (1300 sq in, 1500 sq in and 1700 sq in radiators) **NEW!**
- M2 106 and M2 112

Key Applications:

- Dump
- Plow
- Mixer

Key Benefits:

- A radiator rock guard helps to reduce potential down time by reducing exposure of the radiator to rocks and other debris
