Re: Approved DMS Providers

As you are aware, the SOA IT department is working with Dealer Management Systems (DMS) providers to develop real time integrations with their systems. This integration is in support of the current Care Connect and Schedule Connect programs and will also be required for future programs like Equity Connect and Inspect Connect as well as integration for our future telematics program.

SOA now requires all new Subaru retailers (including Buy/Sell retailers) to use a DMS that is on the SOA Approved DMS provider list (Exhibit 31K in the Dealer Agreement). We will distribute revisions to this list as our DMS provider's transition to support real time integration.

There are a few key changes from the previous approved list. PBS and ADP Dash are now supporting real time integration and have been added to the approved list.

Effective immediately, the approved DMS providers' list is:

DMS	Vendor
Drive	ADP
Dash	ADP
WebSuite 20XX	ADP
DealerTrack	Arkona
OpenMate	AutoMate
Lightyear	DealerBuilt
ADAM	Adam Systems
PBS	PBS Systems Group

We appreciate your cooperation and assistance as we continue to enhance our technology platforms and capabilities.
