and District Parts & Service Managers

FROM: Subaru Distribution and Fixed Operations Departments

SUBJECT: 2015 WRX & STI Performance Exhaust Systems

DATE: April 3, 2014

The 2015 WRX & STI Performance Exhaust Systems supplier has identified a quality concern during production testing. Subaru is taking strict precautions and has returned all inventory for a quality inspection. All efforts are being made to remedy this inventory issue.

As a result, we will protect and fill all sold orders when “approved” systems are received. This will most likely result in a delayed processing schedule, so vehicles schedules for April, could slip into May.

Stock allocation units will have Performance Exhaust Systems deleted and normal processing and shipping will continue. In the interim, we are not accepting Exhaust Systems on any new sold orders and stock orders that are promoted cannot have Exhaust Systems added. We will not be accepting Exhaust Systems orders during the allocation process.

We anticipate that the Performance Exhaust Systems installations will resume in June.

We regret this unfortunate situation and an announcement regarding future availability will be post on Subarunet.

Sincerely,

Subaru Distribution and Fixed Operations Departments
