- Confirm navigation system operation
- HEV: Check hybrid system (confirm Hybrid Ready light is on)
- HEV: Check that EV mode lamp operates normally
- Listen for abnormal noises (body & trim, engine, transmission, wind, etc.)

After Vehicle Road Test

- Check for leaks under vehicle and in engine compartment area
- Check for any open campaigns/recalls prior to release to customer

Items in red indicate new revision/additions.

Perform all items listed as applicable. Models will vary depending on trim level and vehicle specification.

Please make adjustments to this PDI procedure as appropriate to address long term storage. Subaru of America recommends maintaining the battery state of charge, leaving plastic wrap on until delivery and increased air pressure in tires during periods of long term storage.

This vehicle has received a Pre-Delivery Inspection as required by Subaru of America. All items requiring correction or adjustment have been brought into specification as described in the applicable Subaru Service Manual.
