

A5/S5/RS 5 Coupé Audi Technician Report

tock No. Dealer Number		R.O. No.	
VIN Ro	ad test mileage out		Road test mileage in
All items must be completed prior to customer delivery by an Audi technician **Refer to the Special functions tab of ODIS Diagnosis using GFF for the PDI function tests **Audi recommends using an Audi approved battery charger to prevent excessive battery discharge during inspection		Trunk Inspection (continued) ☐ Set spare tire pressure ☐ Verify trunk operation including emergency release handle	
		☐ Test windshield washers for aim and function	
		Open Campaigns/Updates	
Check Elsa for open campaigns and updates. Perform campaigns not requiring SVM if applicable. Campaigns requiring SVM should only be performed after the vehicle has been taken out of transport mode		☐ Test exterior lighting functions	
		☐ Check key functionality including seat memory (if applicable), verify vehicle starts and runs with the start/stop button, verify all doors lock/unlock with remote and Advanced Key, including door handle sensors (if equipped)	
Battery Inspection		Interior	
☐ Check battery clamps for proper torque. Re-torque if required ☐ Perform the A-battery test for new batteries using GFF in ODIS Diagnosis → Special functions → Service work. Select option 2, the battery test for new batteries as part of the pre-delivery inspection and act according to the test result (ok, recharge,		Check operation of all switches: locks, windows, seat adjustment, and child safety features	
			mirror compass to proper zone and check ion/lighting (if equipped)
replace). Ensure diagnosis log is uploaded to the G	o send the current Do not use Guided	☐ Verify operation of a	all interior lights
server by selecting "ok" when tester wants to se generated diagnosis protocol online. (Note: Do r Function. The diagnosis log will not be uploaded		Mirrors: Inspect folomemory (if equippe	ding, adjustments, RH tilt in reverse, and ed)
Transport Mode Deactivation, DTC check, set service reminder		☐ Inspect operation of lighter, aux. outlet under armrest and rear outlet	
*It is advised to start ODIS with the engine running to enable all 5F Test Plans in GFF and also to ensure SVM sees all control units during the SVM check vehicle configuration		☐ Verify operation of a	all front and rear seat belts and latches
☐ Deactivate vehicle transport mode (via Special functions -> Service work -> 19-Transport mode activating/deactivating)		Check sunroof opera	ation (open/close/vent/deflector at edge)
		☐ Check operation of	power rear sunshade (if equipped)
Set service reminder (via Special functions -> 17-PDI-resetting SRI at PDI, counter reset, et	cc.)	Passenger side airba	ag: Verify operation of Passenger Occupant
For MMI3G+ vehicles, set adaptation channel functions -> Service work -> : 5F-Activating/o	ng/deactivating Lipping. Perform hard	Radio	
storage of music). Also referred to as CD Ripp		☐ Verify operation of	CD player
reset of the MMI to complete the activation		☐ Verify operation of A	AMI or aux. input (if equipped)
Perform any campaign update requiring SVM (follow instructions listed in campaign docum		SD card slot: Insert slots as equipped)	SD card and test function (Test all SD card
Under the Hood Fluid Check and Inspection		☐ Verify HD Radio is turned "off" in Radio/Settings Menu	
☐ Check all fluid levels and top off if necessary		Audi MMI/Navigation	
☐ Check engine oil level using Special Tool T40178 on a flat and level surface		☐ Verify and set langu	uage and Measurement Units in Setup Menu
		Set Time source set	ting to "GPS" and set Auto daylight savings
Trunk Inspection ☐ Install wheel bolt cover removal tool from PDI kit and wheel lock key (if applicable) into trunk tool kit behind right side cover		time to " on ." Chang location	ge time zone to the appropriate dealer
			f equipped): Set dealership location (for ealership during road test)

Voice Activation (if equipped): Press the "Talk" button and verify several commands recommended tire pressures listed on the B-pillar doorjamb, and store tire pressure values in Car/System menu Onboard Video Tutorials (USA ONLY) Road Test	Audi MMI/Navigation (continued)	On-Hoist Inspection (continued)	
parking/applies to vehicles with park assist or rearview camera). voice Activation (if equipped): Press the "Talk" button and verify several commands verify several commands v		☐ Install wheel bolt covers and center caps as supplied	
Verify several commands Check for squeaks, rattles and wind noise Check for squeaks, rattles and wind noise Check for squeaks, rattles and wind noise Verify operation of rear view camera and rear parking sensors (if equipped) Verify operation of rear view camera and rear parking sensors (if equipped) Verify operation of rear view camera and rear parking sensors (if equipped) Verify Audi side assist functionality (if equipped) Verify Foundative lane assist functionality (if equipped) Ve	parking)(applies to vehicles with park assist or rearview camera).	tion.
