2007-2014 Mustang Carbon Fiber Limited Slip Differential Normal Noise

2007-2014 MUSTANG GT500, 2011-14 MUSTANG GT equipped with BREMBO brake package, 2010 MUSTANG GT equipped with TRACKPACK, 2008-2009 BULLITT - limited slip differential normal characteristics. These vehicles are equipped with heavy duty/racing type carbon fiber clutches in the limited slip differentials. This type of limited slip differential may exhibit a chatter or moan/groan noise when making sharp low speed turns. These noises are a normal characteristic of the heavy duty/racing type limited slip differential. Note: Driving the vehicle in a tight figure eight pattern 5 times may lessen the complaint for a short period of time.
