44446 2014 Transit Connect - Changing Language In The Instrument Panel Cluster (IPC),  
XL Series

Some customers with 2014 Transit Connect XL series vehicles may want to change the language in the Instrument Panel Cluster (IPC). Since these vehicles are not equipped with steering wheel controls the IDS must be used. Using IDS, access the IPC Configuration Parameters. Select Module Programming, Programmable Parameters. Car Configuration Parameters, Vehicle Configuration, Modify and Reinststate Vehicle Configuration Data. Change the language as needed and continue to follow IDS prompts.
