7" Electra Glo Light Ring Wiring Issue

Purpose:

This bulletin is to inform dealers that some 7" Electra Glo Light Rings were shipped with wiring too short to allow proper installation on MY14 Touring models. Corrected parts are now shipping (noted by part numbers revved to "A").

Action Required:

When installing 7" Electra Glo Light Rings on MY14 Touring models not equipped with 4" Electra Glo Light Rings, the Light Ring wire harness may be too short to connect to the vehicle's wire harness. When this issue is encountered, please use wire harness p/n 69200602 to bridge the gap between the Light Ring harness and vehicle harness.

If the 7" Light Ring is installed on a MY14 Touring bike with 4" Light Rings, the wire harness should be long enough to properly install.

This condition does not affect fitment on any other models or model years.

Affected Parts:

Original Parts:

- 61400152 7" Electra Glo Light Ring, Chrome
- 61400153 7" Electra Glo Light Ring, Gloss Black

Updated Parts:

- 61400152A 7" Electra Glo Light Ring, Chrome
- 61400153A 7" Electra Glo Light Ring, Gloss Black

This issue is only present on the non-"A" parts. The new "A" part numbers have the correct wire lengths.

Questions:

Please contact Technical Service with any concerns regarding application. Please direct all other questions to your Dealer Services Representative.
