44569 MKC - Crank/No Start or Stall With DTC P025A When Remote Started While Still In Transport Mode

Some 2015 Lincoln MKC with Remote Start feature may exhibit Diagnostic Trouble Code(DTC) P025A(Fuel Pump Module A Control Circuit/Open) stored in Powertrain Control Module memory with Crank No-Start or Stall concern. This may be due to unpowered fuel pump control module if the vehicle is remote started while still in TRANSPORT MODE. To turn off transport mode, turn ignition on(ENGINE OFF-KOEO), press the Brake pedal five times and press the Hazard lamp switch two times (ON, OFF) until vehicle instrument cluster indicates that is in Normal mode on the message center. Start engine to ensure all electrical components operate properly. Clear the DTC.
