The customer states that the steering feels stiff during turning. The condition occurs when the vehicle is stationary.

Technical Background

The steering shaft needs to be updated.

Production Solution

Improved intermediate steering shaft.

Technical Service Bulletin

Service

1. Reproduce the customer complaint to verify.
2. Inspect the vehicle's suspension for worn or damaged components. If any issues are found, repair them before proceeding.
3. Remove the intermediate steering shaft from the vehicle.
4. Inspect the intermediate steering shaft and ensure that both of the universal joints move freely.
5. If the intermediate steering shaft is stiff or binds during inspection, replace it.
