2013-2015	ES350	2013-2015	LS600H
2013-2015	LS460	2014-2015	GX460
2013-2015	RX450H	2013-2015	IS250
2013-2015	CT200H	2013-2015	GS350
2013-2015	IS350	2013-2015	RX350
2013-2015	IS350C	2013-2015	GS450H
2013-2014	IS F	2013-2015	LX570

CONDITION

Some customers may experience Bluetooth disconnections or loss of SMS Text Message Functionality on the navigation/audio system with Android phones running Kitkat 4.4. Condition tends to occur to customers who have many previous text messages on their phones.

RECOMMENDATIONS

1. First pair a known good iPhone or other Android phone running OS 4.3 or earlier
2. Operate the known good phone and confirm it does not experience the customer complaint to confirm vehicle system is operating normally.
3. If known good phones above operate normally when connected to the navigation/audio system then the condition is likely unique to Android OS 4.4.x.

There are two options to address the condition with customer's phone:

- 1) For customers who do not use SMS Text functionality in the navigation system, it is recommended to do the following:
 - Delete the Bluetooth pairing on the navigation system and on the phone.
 - Restart the phone (Push and hold power button until pop up screen appears).
 - Pair the phone to the navigation system.
 - During the pairing process the phone will ask "XXX is requesting permission to connect to your messages". Make sure to check the "Do not ask again" checkbox and to select the "No" button.
 - Other pop ups on the phone can be accepted or rejected.
 - Confirm normal Bluetooth operation.

Applicability

13 - 15 MY Vehicles

RECOMMENDATIONS

- 2) For customers who do use SMS Text Functionality in the navigation system, it is recommended to do the following:
- Get customer's approval to backup and then delete old text messages.
 - Install 3rd party SMS Text application which supports SMS backup (Ex. SMS Backup & Restore, Super Backup). Backup old texts using Backup application.
 - Have customer delete most or all old SMS texts in the phone SMS text application (usually called "Messaging").
 - Restart the phone (Push and hold power button until pop up screen appears).
 - Confirm normal Bluetooth operation.
