We have found an issue with the Accessory 22" Wheel missing the required restriction against 2014 / 20 Regular Cab LD Pickup Trucks. The catalogs currently show usage on 2014 / 2015 Regular Cab Pickup Trucks but this is INCORRECT. Engineering is removing the Regular Cab usage from the multiple PNs above and that will remove the usage in the catalogs. The reason for this restriction is to prevent vibratic concerns.

Double, Crew, and SUV are not affected by this restriction.

This issue is only on ACO sales, the LPO sales were restricted properly in the Order Guide.

If you have any vibration concerns on Regular Cab Pickup Trucks that had the 22" Accessory Wheels installed please reach out to your ADI and/or DMA to address customer concerns.

Thank you for your cooperation.
