### **Toyota Announces Voluntary Recall of Certain Tacoma Pickup Trucks for Rear Leaf Springs**

Toyota Motor Sales, U.S.A., Inc., has advised the National Highway Traffic Safety Administration (NHTSA) of plans to conduct a voluntary safety recall of approximately 690,000 Model Year 2005-2011 Tacoma 4x4 and Tacoma Pre-Runner pickup trucks.

The involved vehicles' rear suspension system contains leaf springs that are constructed of either three or four leaves. There is a possibility that a leaf could fracture due to stress and corrosion. If this occurs and the vehicle continues to be operated, the broken leaf could move out of position and contact surrounding components, including the fuel tank. If the broken leaf contacts the fuel tank repeatedly, it could puncture the tank and cause a fuel leak. In the presence of an ignition source, this could result in a fire.

Toyota is not aware of any fires, crashes, injuries or fatalities associated with this condition.

Owners of the vehicles involved in this recall will receive a notification by first class mail. Toyota dealers will remedy the condition at no cost to the owner.

Detailed information is available to customers at [www.toyota.com/recall](http://www.toyota.com/recall) and by calling the Toyota Customer Experience Center at 1-800-331-4331.
