Subject:

CHECK ENGINE LIGHT ON WITH DTC P0452:00 AND/OR P0453:00

Bulletin No: 01-008/14

Last Issued: 04/01/2014

APPLICABLE MODEL(S)/VINS

2013-2015 CX-5 with VINs lower than JM3KE*****438362 (produced before Jan. 27, 2014)

DESCRIPTION

Some vehicles may exhibit a condition where the Check Engine Light illuminates immediately after the engine is started and DTC P0452:00 and/or P0453:00 is stored in memory.

- P0452:00 Fuel tank pressure sensor low input
- P0453:00 Fuel tank pressure sensor high input

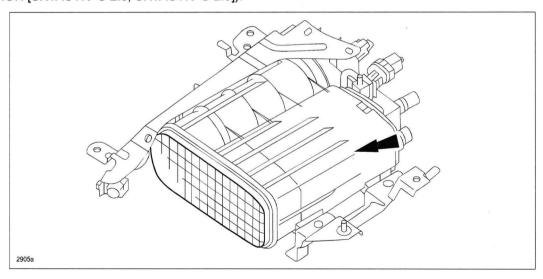

This concern may be caused by ants entering the FTP sensor through an opening (to atmosphere). The ants bite and eventually damage the wiring, which results in an improper FTP sensor output.

To eliminate this concern, the inside of the opening pipe (to atmosphere) has been modified to prevent ants from entering.

Customers having this concern should have their vehicle repaired using the following repair procedure.

REPAIR PROCEDURE

- 1. Verify the customer concern.
- Replace the charcoal canister assembly (includes FTP sensor) with a modified part according to the instructions on MS3 online or the Workshop Manual (section 01-16 CHARCOAL CANISTER REMOVAL/INSTALLATION [SKYACTIV-G 2.0, SKYACTIV-G 2.5]).

3. Verify the repair.
