REVISION NOTICE

November 6, 2014 Rev1:

- Applicability has been updated to include 2015 model year NX 200t, NX 300h, RC 350, and RC F vehicles.

Any previous printed versions of this bulletin should be discarded.

Introduction

During the manufacturing process, tires are mounted on the vehicle as matched sets to help reduce conditions such as pulling or drifting. If the wheels are replaced or refinished before vehicle delivery, it is important that the tires remain on the vehicle in the same location and in the same direction of rotation.

Please refer to the following procedure to ensure that the original tires stay in the same location on the vehicle.
