2014 Jetta, Passat, Beetle, and Beetle Convertible – G85 Steering Angle Sensor Location Tip

The location of the G85 steering angle sensor in these vehicles depends upon the steering system.

- Electromechanical Power Steering: (PR Code – 1N3)

The G85 sensor is located in the electromechanical steering gear.

- Hydraulic Power Steering: (PR Code – 1N1)

The G85 sensor is located in the steering column (integrated into the clockspring).

If a GFF test plan has indicated that the G85 sensor should be replaced, it is critical to verify the location of the sensor to ensure the correct part is replaced.
