Under Hood Fuse Panel (SA/SB assembly) with part number 000 937 125 Supplied Without Power Distribution Bar (SA panel)

Technical Background

The supplied under hood fuse panel (SA/SB assembly) with part number 000 937 125 comes without the power distribution bar (SA panel). When replacing an under hood fuse panel, the technician must remove the power distribution bar from the original under hood fuse panel and install it on the new assembly. See (Figure 1) below.

Production Solution

Not applicable.

Technical Bulletin

Service

Modification of SA/SB assembly

Carefully remove the power distribution bar (Figure 1, number 1) with a suitable tool such as a small pocket screwdriver in the area of the three arrows (Figure 1).

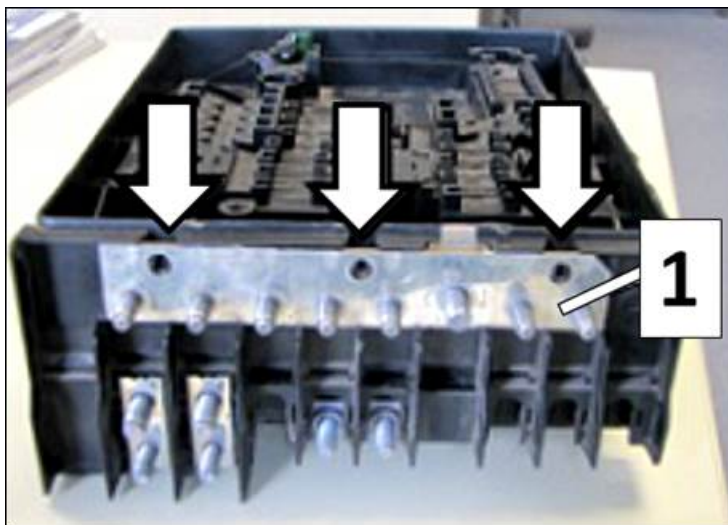

Figure 1

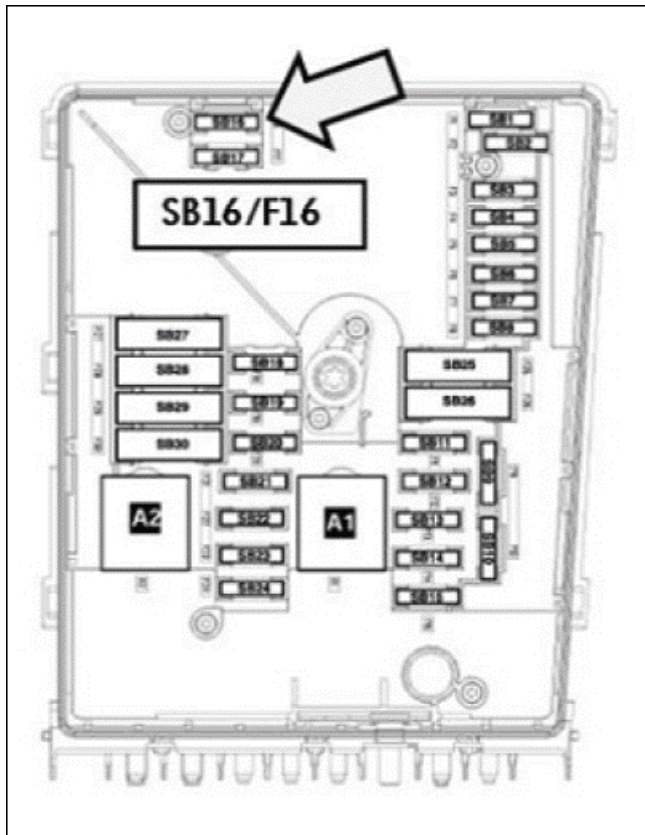

Install the power distribution bar to the new SB panel.

 **Note:**

When using the new SB panel part number 000 937 125, the power distribution bar of the existing SB panel must be removed and installed on to the new SB panel. Make sure that the power distribution bar does not twist or bend.

Should the power distribution bar become compromised, please email vwoaspecialservices@vw.com

Technical Bulletin

For the position SB 16 (figure 2) a 30 A fuse, part number N 017 131 25 must be used.
