

Service Bulletin

File in Section: -

Bulletin No.: PIT5279

Date: May, 2014

PRELIMINARY INFORMATION

Subject: Driver's Power Or Memory Seat and/or Power Adjustable Pedals Inoperative (Inspect For Poor Terminal Tension)

Models: 2015 Chevrolet Tahoe, Suburban
2015 GMC Yukon Models

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition/Concern

Some owners may comment of the driver's power seat or the memory seat functions are inoperative. Also, if the vehicle is equipped with adjustable pedals they will be inoperative. While performing diagnosis, make sure to check terminal tension at the left IP fuse block (X51L) connector X1 terminal 27, with test probe J-35616-35 (VT).

Recommendation/Instructions

If the terminal is found to have poor tension, it will need to be replaced. The terminal is available from the WPC. The WPC part number is WPC751. Please fill out the WPC request form and submit.

Note: There is a very limited supply. Therefore, please only order what is required to repair the vehicle being repaired.
