

Service Bulletin

File in Section: -

Bulletin No.: PI1245

Date: May, 2014

PRELIMINARY INFORMATION

Subject: Auto Memory Recall Option Addition for Memory Seat Functions with Manual Transmission Equipped Vehicles

Models: 2014 Chevrolet Corvette

Condition/Concern

Some customers may comment that the memory seat moves to the stored memory seat position when the door is opened. Customers would like the seat to move when the ignition is turned on just like the automatic transmission equipped vehicle.

Recommendation/Instructions

Reprogram the seat memory control module with the latest calibrations available on TIS2WEB. Refer to Seat Memory Control Module Programming and Setup (Driver Seat) in SI.

Once the new calibration has been installed, an additional menu option will be available under the remote recall menu found under the "Vehicle", "Comfort and Convenience", "Auto Memory Recall" menu and the new selections are "Off", "On - Driver Door Open", "On - At Ignition On."

Note: For the remote recall memory seat feature to operate, the parking brake must be applied.

Warranty Information

For vehicles repaired under warranty, use:
