Date: March, 2014

PRELIMINARY INFORMATION

Subject: Installing Z51 Wheels On A Non-Z51 Car

Models: 2014 Chevrolet Corvette Stingray

A dealer or customer may inquire about installing wheels and tires associated with the 2014 Corvette Performance Sport Handling Package (RPO Z51) on a vehicle not built with RPO Z51 from the factory.

Note: This does NOT involve any GM Accessory Wheels - such as the RPO 5YU or 5YV.

Installing Z51-optioned wheels and tires on a vehicle not equipped with the Z51 package CANNOT be performed at this time.

There are potential operational differences within the braking, stability, traction and suspension systems of Z51 vs. non-Z51 equipped vehicles that prevent this swap from occurring at this time.

GM is currently evaluating the possibility of adding similar wheels to a non-Z51 vehicle as a GM Accessory, and whether or not hardware and/or software/calibration changes may be required. This PI will be updated when additional information becomes available.
