Content**Issue**

We have received a number of Reports that Land Rover customers are reporting that the Centre Console Front and rear* Cooler box are not operating

Cause

Customer Perception

Action

Analysis of returned parts has shown no fault found.

The Front and Rear* Cooler boxes are both controlled via a switch in front of the Cooler box when the ignition is switched on. The On / Off status of the Cooler box is indicated via the green light illumination in the switch (green light = ON; no light = OFF).

* Executive class rear seats

Please Note:-

There is a short delay (2-3 seconds) between pressing the switch and illumination of the indicator in the switch
