Address

City, State Zip

Subject: Lift Axle Product Improvement

Dear Kenworth Customer,

Kenworth has determined that the primary (rear) air circuit installed on your vehicle does not meet our quality standards. The vehicle meets U.S. Federal Motor Vehicle safety standards for air brakes and is safe to operate, however, due to the configuration of the air brake circuits on the suspect chassis, a larger rear service air tank is required to meet Kenworth quality standards.

Once the modification has been performed, the new, large rear service air tank will maintain greater capacity, further exceeding Federal Motor Vehicle Safety Standards.

The chassis numbers listed by VIN on this letter require repair by an authorized dealer. We would like the opportunity to perform this repair. Please contact a Kenworth dealership to schedule an appointment for this work. You can find the nearest Kenworth dealer at Dealer Locator on the website www.Kenworth.com.

When contacting your selected Kenworth dealer, refer to campaign **TIB 13-040** and the VIN listed on this letter. The repair will take approximately **9 hours** and there will be no charge to you if completed within Standard Warranty (excludes Extended Warranty) or for repairs completed by **03/01/2016**, whichever is greater. We apologize for this inconvenience but /ask for your cooperation to ensure continued satisfaction with Kenworth products.

Thank you,

Mike Kalkoske
Director, Quality Services
Kenworth Truck Company
