## 13 ft Single Axle HD Tilt (T1)

Please do not sell any in stock 13 ft T1 units.

We have found an issue with the bend in the tongue on the 13ft units that could cause the tongue to crack at the bend. This issue is limited to 13 ft models only. All units that shipped after November 3<sup>rd</sup> will not have this issue.

Replacement parts and instructions for repair will be sent to each dealership this week. The repair will require welding, but will be fairly simple. All dealers will be properly reimbursed for this repair. We are also in the process of contacting owners of all sold 13 ft T1 units.

If you have sold a 13ft T1 that has not been spiffed or registered for warranty. Please contact us with owner's contact information immediately.
