PITSTOP — **TECHNICAL OPERATIONS**

SUBJECT:	SORENTO (UMa) - INTERIOR LIGHTING KIT WILL ONLY ILLUMINATE IN RED

In an effort to better match the factory lighting color on 2016MY Sorento (UMa) models, the logic for the port/dealer installed interior lighting option kit (P/N C6F55 AC100) has been changed to illuminate only in constant red (A). Although the LED lights are capable of displaying multiple colors, the control module logic will only allow for illumination in red.

NOTE: Pressing and holding the ON/OFF button (B) for more than two seconds will 'function-check' the lighting system causing the LED lights to quickly flash from green > blue > red > off (C). Once the test is complete, the lights will resume illumination in constant red.
