RE: Warranty Extension: 2016 Pilot Odometer Gauge Control Module - Odometer Mileage

Today, December 16, 2015, American Honda is announcing a warranty extension for certain 2016 Pilot vehicles affected by service bulletins 15-073 and 15-074. Please check VIN status inquiry to determine if a vehicle is eligible for the extension.

Service bulletin 15-073, *Non-Compliance Recall: Gauge Control Module - FCAN BUS OFF / Product Update: Gauge Control Module - Odometer Mileage / Gauge Control Module - Auto Door Lock Settings Resets*, covers vehicles eligible for the FCAN Bus Off non-compliance concern. A subset of vehicles affected by this non-compliance recall are *also* affected by the gauge control module odometer problem and are eligible for warranty extension coverage to compensate for the additional miles potentially accrued due to the error.

Service bulletin 15-074, *Product Update: Gauge Control Module - Odometer Mileage and the HDS Does Not Communicate*, covers vehicles eligible for the HDS communication issue. A subset of vehicles affected by this product update are *also* affected by the gauge control module odometer problem and are eligible for warranty extension coverage to compensate for the additional miles potentially accrued due to the error.

The new service bulletin, 15-075, *Warranty Extension: 2016 Pilot Vehicle Warranty Mileage*, covers those VINs within the 15-073 and 15-074 ranges affected by the gauge control module odometer problem, extending the vehicle's warranty coverage by an additional 12,000 miles to compensate for any potential excess mileage accrued due to the error.

American Honda expects to notify customers of this warranty extension by early January, 2016.

As always, be sure to check VIN status inquiry to determine if this warranty extension or any other outstanding campaign repairs/updates may apply.
