

## **MIL On with DTC P0606? Check for Aftermarket Spark Plugs**

### **AFFECTED VEHICLES**

2006–08 Civic, 2006–08 Civic GX, and 2006–11 Civic Hybrid

**EDITOR’S NOTE:** This article replaces “Got DTC P0606? Check for Aftermarket Spark Plugs,” posted in **September 2009**.

Is the MIL on with DTC P0606 (ECM/PCM processor malfunction)? Check for aftermarket spark plugs that include a built-in capacitor; they can cause electrical interference that can set this DTC.

If the engine has that type of spark plugs, swap them with a set of the recommended spark plugs. Then, clear the DTC and retest.

If the DTC **doesn’t** come back, you’ve found the problem. Let the service advisor know so he or she can contact your customer for direction. But if it **does** come back . . . then continue with normal system troubleshooting.
