2014	Civic	EX
		EX-L
		EX-L with Navigation
		Si
		Si with Navigation
2014	Civic Hybrid	All Trim Levels
2015	Fit	EX
		EX-L
		EX-L with Navigation

EDITOR'S NOTE: This article replaces the one posted in **September 2015** to extend that article's shelf life. The issues covered are still being addressed.

Do you have a vehicle with 7-inch Display Audio in your shop for any of these problems?

- When shifting into Reverse, the LaneWatch camera view comes up instead of the one for the rearview camera.
- When activating LaneWatch, the rearview camera view comes up instead of the one for LaneWatch.
- After turning off the audio unit, AM/FM audio keeps playing.
- In Analog Clock mode, depending on the language, double-digit dates for certain months are cut off and look like single-digit dates.
 - English - June
 - Spanish - May and September
 - French - January, March, August, and September
- When playing an MP3 audio file from a USB source, the head unit freezes.

These problems are reported to happen intermittently and we're working on a fix. Until it's available, replace the audio unit. Reman units have been updated.
